February 2024 Business Summary

After cleaning the data I was given, the total of the revenue was 162,362 in total of 98 unique orders. Before computing, I saw that there were 2 sets of duplicates which I then removed. If this happens to not get caught, it would've been 6,990 inflated for the actual calculation. The product that contributed the most is Laptop at $73,718, followed by Phones at 36,348 and Tablets at $30,398. The region that had the highest revenue is South at $46,676. The top 5 customers who have spent the most on our business were Michael Thomas, Robert Wilson, James Moor, Patricia Wilson, and Linda Moore. For the orders above $1,000 I was able to flag 56 orders. Before analyzing the data, I also cleaned and standardized the customer's first and last name. One limitation I noticed is that for some order same names appear, but the emails are different and there's also some inconsistencies between city and region information.
